

WHAT IS CLAIMED IS:

1. A body assembly of light receiving/transmission module, comprising:  
a sleeve comprising a bore; and  
a coupling comprising an upper part, a lower part, a hole through the upper  
5 and the lower parts, and a bundle of optical fibers fitted in the hole,  
whereby aligning light in an optical connector of an alignment device  
inserted in the bore with the bundle of optical fibers will align the sleeve with the  
coupling prior to being formed together.
2. The body assembly of claim 1, wherein the upper part of the coupling  
10 comprises a top projection received in the bore.
3. The body assembly of claim 1, wherein the lower part of the coupling  
comprises a bottom slope.
